

Wind solar and energy storage project approval

Will trump approve solar or wind power projects?

Wind turbines operate at a wind farm near solar panels near Palm Springs, California, on March 6, 2024. President Donald Trump on Wednesday said his administration will not approve solar or wind power projects, even as electricity demand is outpacing the supply in some parts of the U.S.

Can federal lands be used for wind and solar projects?

These laws ultimately raise the question of whether the use of federal lands for wind and solar projects is permissible, given these projects' encroachment on other land uses and their disproportionate land requirements, especially when reasonable project alternatives with higher capacity densities are technically and economically feasible.

Should wind and solar be included in long-term energy plans?

In the U.S., large amounts of onshore wind and solar PV capacity have been installed in the last two decades, and the commercial maturity and cost-competitiveness of these resources have led decision-makers to feature continued expansion of wind and solar in long-term energy plans.

Do energy infrastructure projects need a siting & permitting process?

All energy infrastructure projects undergo some form of siting and permitting impacted by government regulations.

Will trump approve wind or farmer destroying solar?

"We will not approve wind or farmer destroying Solar," Trump, who has complained in the past that solar takes up too much land, posted on Truth Social. "The days of stupidity are over in the USA!!!"

Should solar be allowed on federal land?

The U.S. has resumed permitting of solar and storage on federal land but developers face a lack of agency staff and uncertainty over tax credits.

5 days ago; States fast-track wind and solar permits and contracts to beat Trump's deadline Federal tax credits have brought project costs down 30 to 50 percent, advocates say.

WASHINGTON (AP) -- All solar and wind energy projects on federal lands and waters must be personally approved by Interior Secretary Doug Burgum under a new order ...

Oregon regulators have approved plans for the country's largest solar and storage project. Pine Gate Renewables said it plans to build a 1,200 ...

Wind solar and energy storage project approval

BLM approves NV Energy's Greenlink West transmission, Arevia's \$2.3B solar + storage project NV Energy will buy power from Arevia's 700-MW solar/2.8-GWh battery project ...

On July 15, the U.S. Department of the Interior (DOI) circulated an internal memorandum requiring over 68 different DOI actions related to wind and solar project ...

This paper examines onshore wind, solar PV, offshore wind, geothermal, and electric transmission infrastructure in order to survey an illustrative range of clean energy ...

Projects seeking leases, rights-of-way, construction and operation plans, grants, consultations and biological opinions will now be subject to approval by US Secretary of the ...

WASHINGTON -- Today, U.S. Secretary of the Interior Doug Burgum signed a Secretary's Order to more efficiently manage our nation's energy resources by permitting ...

This document outlines key principles that decisionmakers and stakeholders should incorporate in the development of effective state policies for the siting and permitting of large scale ...

Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already ...

The report compares state level siting authorities and provides specific analyses of wind, solar and battery storage projects supported by academic literature, ...

In March, the DOI's Bureau of Land Management (BLM) resumed its review of solar, storage and geothermal applications, a BLM spokesperson ...

Cubico Sustainable Investments, a global player in renewable energy, is making significant strides in Australia by submitting proposals for ...

What Are Energy Storage Systems? Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid, which can ultimately reduce energy costs for New Yorkers. ...

In March, the DOI's Bureau of Land Management (BLM) resumed its review of solar, storage and geothermal applications, a BLM spokesperson told Reuters Events. Wind ...

Currently, developers have more than 2,000 solar, wind, battery storage and hybrid (solar plus storage) projects waiting for approval in the PJM ...
